CANAL POINT, PALM BEACH COUNTY, FLORIDA, SEPTEMBER 5, 1924.

Subscription 1 Year, \$2.00

PAHOKEE TEMPORARY BRIDGE IF NEEDED

Construction of Florida East Coast Railroad Fast and Ahead of Schedule

PAHOKEE TO GET ROAD BY FIRST OF DECEMBER

St. Lucie North Abutment In; Driving Cofferdam Pier; Pouring Concrete Here

Construction of the Florida East Coast railroad extension from Okeechobee southward along the lake front to Pahokee is ahead of schedule, the fast progress being due largely to the unexpectedly good weather, the lake holding at a low stage and rainfall abnormally small. Unless an equalizing storm occurs the railroad will reach Pahokee in November. A temporary bridge will be put across West Palm Beach canal by the bridge company if the rails reach Canal Point before the contractors complete the permanent structure.

The railroad has been extended for one mile south of St. Lucie bridge and ties and rails are being hauled in to continue it. A mile of muck intervenes between the rails laid and the tyner farm on the ridge.

Vertical lift is the type of draw-spans that will be put in the Florida East Coast railroad bridges over both the St. Lucie canal and the West Palm Beach canal. Instead of a span that swings or a "jack-in-the-box" span, openings in the waterways will be made by elevating a section of the bridge to a designated height, power for the lifts to be furnished by gasoline engines.

The north abutment of the St. Lucie canal bridge is in the cofferdam being driven for the north pier and excavation is under way for the south abutment. Equally satisfactory progress is being made on the cofferdams for the bridge at Pahokee.

Where the cofferdam is in for the south abutment and excavation will start this week for the one on the north. Pouring of concrete for the south abutment of this bridge will start in a few days. The St. Lucie canal bridge is to have two abutments and four piers; the Canal Point bridge two abutments and two piers, the piers being erected from the water and the abutments on the land. The distance between the abutments at Canal Point is 142 feet; at St. Lucie canal, 202 feet, the larger canal being the wider. There is a feet of water in West Palm Beach canal and 20 in St. Lucie. With the Union Bridge Company putting in the foundations, the steel work of the bridge will be done by the Phoenix Steel Company.

Only 21 "stations" of 100 feet each are lacking in the grade between Canal Point and the Tyner farm, seven miles north of Canal Point, and 45 laborers are in camps available for the completion of these 21 stations. J. D. Donahoe is "walking" a P. & H. drag-line excavating machine on the grade northward from the front to the strength and fill intervening spaces. The Bucyrus steam shovel is finishing grade of which the P. & H. drag-line made part. "Bulkhead" is still being put in. Clearing crews are at work three miles north of Canal Point and south of the Tyner farm.

SOIL AND ELEVATION MAP OF COUNTY IS PROPOSED

West Palm Beach, Aug. 31.—A topographical survey of Palm Beach county, which would result in a government map showing the elevation of all the land and the waterways and types of soil, is the project being discussed between Secretary H. E. Robinson of the Chamber of Commerce and Col. Birdseye, chief topographer of the United States geological service. Sending a force of government surveyors here to make such a map, half the expense to be paid by the government and half by the county, is the proposition which Col. Birdseye has made to the Chamber.

DISCARDED, BUT GOOD

Half a dozen stalks of sugar cane laid in front of the Chamber of Commerce Monday evening. "Pretty good samples even if the cane is immature," said G. A. Watkins, an opinion with which others agreed. The length of the joints and the heavy weight of the stalks was noted. Presently a negro man came along and picked up the bundle of stalks and took them to the Soule's Kraemer Island land. Mr. Soule is grubbing out the cane to clear the land for vegetable crops. This instance how good the discarded stalks are—discarded stalks were taken for show specimens.

DO YOU KNOW NAMES OF CANAL POINT STREETS?

How many persons know the names of the streets in the Canal Point townsite? Few, probably. L. N. Simon of West Palm Beach has complied with the request of The Everglades News and sent a blue-print copy of the plat on which are shown the names of the streets. Most everyone knows that the townsite is platted as "Nemaha," although the post office is Canal Point. "Lake Boulevard" is the name of the street paralleling Lake Okeechobee; along the canal are "North Canal street" and "South Canal street." The next street south is "Main street," 80 feet wide. Then come "East Beach street" and "College Avenue," the avenue being on the north side of the schoolhouse. "Park Row," "Florida avenue," "Okeechobee avenue," "Palmetto avenue" and "Cypress avenue" complete the thoroughfares that run east and west. The north and south streets paralleling "Lake Boulevard" are "Flagler street," "Broward street" and "Osceola street." North of the canal, on the "Nemaha" tract from Canal Point, are "Broad street" and beyond that is "Hammon avenue."

The Pioneer Investment Company has reserved a part of the Nemaha townsite north of the canal and although the name "Everglades street" is retained, other street names are changed.

STATE ROAD NO. 8 TO BE DONE ON TIME

Linked With Conners Highway It Will Bring Much Travel Through Canal Point

State road No. 8, with which Conners Highway connects at Kissimmee river, is practically completed in Highlands county so far as the rock base is concerned and the laying of asphalt is expected to begin within the next week, according to an Associated Press dispatch from Kissimmee.

The Myers Construction Company is making good progress on the 11-mile stretch west of the Kissimmee river, where the contractor has already made the contract for a five-mile section, also are building good progress. The contractor, the new section, which is six miles in length, is having some trouble but his difficulty will not delay the opening of the road beyond December 1.

All of the material for the bridge over Kissimmee river is being inspected at the sawmill by the engineer in charge. To make certain that inspection will not hold up construction, the bridge is being put in by the Conners Highway organization, which is anxious to get the passage over the stream to cars bound for their toll road. Land development operations to be carried on by the Conners Highway and the Seaboard Air Line railroad land department make certain that traffic on Conners Highway through Canal Point will be heavy this winter.

LYTAL LIKES RIDGE

To keep in touch with his customers on East Beach, J. T. Lytal, president of the Lytal-Beach Furniture Company of West Palm Beach visited Canal Point last week. He has just returned from a buying trip to northern markets and has put in a big stock for the winter. Mr. Lytal used to live in the sugar district of Louisiana and he looked on the Canal Point plantation with interest, remarking that the cane beat anything he ever saw and that it assured a great country.

ANTHONY'S SALE

E. D. Anthony, owner of the pioneer men's clothing store in West Palm Beach, is one of the best boosters for the Everglades. Since the first canal was dug from the lake to the east coast he has made it his business to keep in touch with this region. He does his water to Okeechobee with this region his store has a large advertisement on another page announcing an eleven-day sale.

HOTEL CORPORATION

How many of the readers of The Everglades News can and will take stock in a company to build a hotel on East Beach, or an apartment house, or dwelling houses? Proposal has been put forth that a building company be organized, the exact character of the operations to be decided after a group of interested people has been formed. It is felt that because there is no surplus capital among the residents of East Beach it will be necessary to get outside capital and it is believed that loans can best be secured by a corporation. As there will be a heavy demand for living accommodations and no hotel will be demanded by the metropolis it is certain that the operation of a building company will be profitable. Non-residents who have prospered in other localities are being asked to indicate their views on the subject.

TELEGRAPH WIRE HERE BY OCTOBER 1

Western Union Service Follows Construction of Florida East Coast

DISTRIBUTING POLES ON R. R. RIGHT OF WAY

To Provide East Beach With Communication Service in Shipping Season

Okeechobee, Sept. 3.—To obviate the relaying of local messages out of Jacksonville for Canal Point via West Palm Beach, the crew of Western Union Telegraph linemen who have been working here for nearly a month expect to make direct telegraphic communication with East Beach possible by October 1st.

The new line follows the right-of-way of the Florida East Coast railway Okeechobee-Miami extension and will prove of inestimable value to Pahokee and Canal Point, which towns have had to depend on the line to West Palm Beach to send and receive telegrams.

EVERGLADES STATION IS SCENE OF GREAT ACTIVITY

Special Correspondent
Belle Glade, August 28.—The Everglades Experiment Station near here is the scene of considerable activity these days. Not only is work going ahead steadily on the experiments with field crops under direction of Foreman George T. Foster, but a number of improvements of permanent nature are being made. Gradually more and more land is being cleared and prepared for planting. A party of six, carrying 2000 gallons of lime has just been installed at the station and to arrange it to be used for pumping water off the property or pumping it on, as may be desired. This work of installing this pump has been done the past week by a crew of men from the drainage board shops at West Palm Beach, the party consisting of Messrs. W. T. Bues, foreman, C. A. Russ, Luther Raulison, Bob Crofton, S. C. Williams and a Mr. Foster.

The first planting of pineapples has been made at the experiment station, consisting of 12 plots of the Red Spanish variety. Beginning in October, these plots will be used in making tests of the variety. The station is taking advantage of the work now being done by the dredge Panama, in the upper Hillsboro canal, to secure rock for road-building in the station grounds and a large load of rock goes down the canal each day for this purpose. The addition of the road will add materially to the appearance of the station grounds.

Dr. Wilmon Newell, director of the four experimental stations, the University of Florida and Ed. L. Ayers, agriculturist of the stations, are both now at the Everglades station, where they are carrying on their experiments. While here, Mr. Ayers will map the grounds around resident and office building preparatory to making plantings the coming winter of various ornamentals, palms, shade trees, etc.

The experiment station has one of the most complete sets of meteorological instruments and appliances to be found anywhere in the Glades. To begin with, there are the standard maximum and minimum thermometers and rain gauge of government pattern, for the station is now an official U. S. Weather Bureau station. There is also a combined thermometer and hygrometer. As to the solid rock, it is of the pink of condition and in perfect accord of the temperature and the percentage of moisture in the air. Equipment has also been installed by a high degree of accuracy. Cement posts, graduated to feet and inches, have been put in the ground at two places on the station property and by means of these it will be possible to determine the amount and rate of soil settling. The latest addition, installed this week by Director Newell, makes it easy to tell at a glance just how far the water level is below the surface of the soil. All of these instruments are in charge of Field Assistant M. A. Bsker, who takes all readings daily and takes pride in keeping them all in the most accurate and up-to-date condition. The data secured from these instruments, as the months go by, will constitute valuable and important information for those engaged in agricultural pursuits in the Glades.

Sales Completed By East Beach Land Co.

Through I. M. Lair of the East Beach Land Company, sale of a 5-acre tract of Pahokee by H. P. Walker of Auburndale to R. Brown of Lakeland. The tract is in section 18, south of the ridge and south of a tract owned by Rev. A. J. York. There are no improvements on the property. The consideration for the tract and lot was \$4000. Mr. Shive will erect a dwelling house on the farm tract and make other improvements.

MORE HOUSES AT GROWING CHOSEN

Trucking and Avocado Developments Are Factors in Community Advancement

Chosen, Sept. 3.—The dredge Panama which had been excavating from the south half of the Hillsboro canal, has turned around and is now excavating from the north half and placing the rock on the north bank of the canal. While travel is made more difficult for the time being we will soon have excellent roads on each side of the canal. W. W. Ziegler, a son of the late Mr. Ziegler, reports an interesting trip through the middle west during the summer. Wm. P. Blakey of Ocoee and James Brooker brought with them last week Messrs. Walker and Hain to erect a house and garage on the canal here. They are now doing and a couple of houses for laborers on the farm. Mr. Blakey thought so well of the custard apple here that he bought another two of the best.

J. R. Leatherman is at work on building operations on his farms here. On the one he is erecting a building 48 feet long, one story only, for laborers. On the other place he is erecting a two-story house for a white tenant family. School opened at the 25th with a fairly good enrollment. Several families are expected soon and the numbers will be increased in both rooms for the school starting in W. Hart and wife returned Saturday from a visit to Atlanta. Roscoe Braddock and wife moved into their new house the past week. Mr. Bradfield and his family were visitors from Miami recently.

I. W. Leatherman made a trip to Sebring and Moore Haven and purchased a very fine span of horses which he drove back. Mr. Leatherman says that he must have a team to plow among his trees—cottons, avocado and banana. Almost daily persons are coming to this section looking up farming connections. Our former prediction of a large fish house was more than fulfilled. Messrs. Nye, Scott and Stuart of the First American Bank & Trust Co. of West Palm Beach constituted a fishing party on a late last week. Labor Day and incidentally surveyed the business situation.

FISHING SEASON OPENS

Okeechobee, Sept. 3.—While none of the local fish houses, the Booth and Ward, Everglades, limited Okeechobee, cared to make public a prediction on the result of the fishing season this year, it is no secret that all are optimistic now that the lake level is almost at normal again. When the lake was "up" the bass and channel catfish, for which Okeechobee is famous, kept to the heavy growth of grasses in shore and made the operation of fishing extremely difficult. The opening prices of fish, f. o. b. Okeechobee are: Black bass 14c lb., dressed channel catfish 15c lb., bream 6c and croppie 5c.

RAILROAD TO TAKE CARE OF GROWERS

Florida, East Coast Officials Promise That Facilities Will Be Adequate

BIG ACREAGE OF FALL CROPS IS WARRANTED

Space For Packing Houses on Sidings; Receipts By Boat Provided For

Farmers in the East Beach and Pelican Bay territory and on the islands can plan their operations with full assurance that the Florida East Coast railroad will have its line to Pahokee by the first of January and will provide them with service, including refrigerator cars, equal to the service available to truckers in any part of the state. This is the promise made by F. W. Kirland, freight traffic manager, who with other officials of the F. E. C. was on East Beach yesterday.

Other members of the party were H. N. Rodenbaugh, general manager; J. H. Owen, general superintendent; H. E. C. Hawkins, general freight agent; O. V. Oberdorfer, engineer in charge of construction; L. Posner, superintendent of the northern division of the Okeechobee branch, and T. N. Beckwith, fruit and vegetable agent.

One of the purposes of the visit to the eastern shore of Lake Okeechobee, on which the railroad is being built from Okeechobee, was to get information of the acreage to be put to truck crops and another object was to select locations for side-tracks and landing stations. Inspection of the construction work warranted the officials in saying that the road would reach Canal Point by the first of December and Pahokee by the first of January, and probably reach both points earlier.

However large the production of vegetables may be, the Florida East Coast will take care of it, Mr. Kirland said.

The railroad will be extended far enough, enough, general manager; J. H. Owen, general superintendent; H. E. C. Hawkins, general freight agent; O. V. Oberdorfer, engineer in charge of construction; L. Posner, superintendent of the northern division of the Okeechobee branch, and T. N. Beckwith, fruit and vegetable agent.

At the time The Everglades News went to press it was not practical to state the exact locations of the landing stations but the party was anxious to give the assurance that the locations would be convenient to all growers in this territory.

BEACH ROAD TO BACOM POINT

West Palm Beach, Sept. 4.—Announcement that is expected to start a survey the latter part of this week of the proposed highway from Canal Point and Pahokee south to Bacom Point was made today after the meeting of the county commissioners by George O. Butler, county engineer. The road, he said, will with the Conners highway come near to completing a highway around the entire east beach of the lake.

The county engineer was authorized to buy an oil testing outfit for use on the county roads.

With county officials expecting to appoint R. A. Conkling county agent as soon as he could qualify by returning to this state from a trip, they were told yesterday by R. O. Spencer of the agriculture department of the state university, that he would not approve any recommendation for Mr. Conkling. He stated that he considered Mr. Conkling an excellent man for such work but added that he believed Mr. Conkling was too aged in 40 or 45 years. No action was taken.

HURT WHEN CAR SKIDS

An Okeechobee skidded two miles north of Canal Point at 7:30 Wednesday evening, ran off the roadbed and into the ditch and its two occupants were injured. The driver, a Mr. Smith from New York was on his way from Okeechobee to West Palm Beach. He was accompanied by a negro man, Crickett Cross came along soon after and took the men to West Palm Beach. Mr. Smith had borrowed a car. He reports that he considered that bought a large tract of the Conners' land.

HOWARD SHARP
Editor and Manager

Begins to look as if the policy of
 The Everglades News is right in some
 matters after all. The Stuart Messenger
 concurs with C. Clinton Page's
 comment that the absence of "bull" in
 this paper is commendable and that
 exact representation of conditions is
 better than "florid, colored, exaggerated
 boom stories." Correcting some of
 the abuses and inspiring residents to
 keep their perspectives on straight is
 a necessary proceeding at this stage.

GLADES COUNTY

Moore Haven, Aug. 30.—The New-hall special drainage district land owners held a meeting Tuesday at the Glades county court house. R. E. Kurtz acted as temporary chairman. Ballots were first cast for a three-year supervisor, Henry Gove being elected. Then ballots were cast for a two-year supervisor, Captain J. J. O'Brien being elected. D. L. Lence was elected next as a one-year supervisor. The meeting adjourned and the board immediately called a meeting to transact business in the interest of the district. The board of supervisors appointed Fred Planders as chief engineer of the district and R. E. Kurtz as attorney and secretary.

W. C. Hooker of Bare Beach and Clewiston was in town last week. He is preparing over three hundred acres for fall crops at Bare Beach, and says that in his vicinity there are eight or ten tractors putting in full time getting ready for fall crops, which will consist largely of beans, peppers and eggplants. Mrs. Conway Zimmerman and mother-in-law, Mrs. T. J. Zimmerman, have returned from a short visit in Dandelin with relatives.

Mrs. Albert Olsen and little daughter have returned from a several months visit with her relatives in New York.

Jack T. Taylor, county commissioner of Collier county, motored to Moore Haven from Everglades Saturday. While in town C. L. Williams closed a deal for Mr. Taylor which sold his home to N. P. Royer of LaBelle, principal of the Moore Haven schools.

Teachers of Glades county for the school year are as follows: Moore Haven: Prof. Carl E. Royer, LaBelle; Mrs. C. E. Royer; Miss Erwin Gray Gwyn, Blue Mountains, Miss; Mr. H. C. Keating, Zolfo, Fla.; Miss Pauline Howard, Arcadia; Miss Mildred Brundick, Miami; Mrs. Nell L. Jackson, Clyde, Mo.; Mrs. B. C. Fountain, Moore Haven; Mrs. D. Moffat, Moore Haven; Orton; Mrs. W. H. Turner, Bartow; Palmdale; Mrs. Edith Daugherty, Palmdale; Tasmania; Miss Evelyn Turner, Lansing; Bee Branch; Mrs. Grace W. Stannley, Fort Pierce, Ind.; Bear Creek; Mrs. O. C. Head, Mobley, Mo.; Buckhead; Almont Ake, Venus, Fla.

OOKEELANTA

Ookeelanta, Aug. 26. (Delayed in receipt)—The weather is very warm. Farmers are shucking corn, which made 40 to 50 bushels of shelled corn to the acre. Some are plowing and some have planted potatoes and melon seedlings. The ground plows fine. There were two or three cars here today. Robert Cooper was plowing last week and his tractor turned over and he had to get Mr. Lockmiller to pull it back.

OOKEECHOBEE

Construction of an apartment house building at Okeechobee by Mrs. D. C. Turnpseed was stopped by the state hotel commission because the law requiring that a permit be secured from the commission had not been complied with.

E. E. Williams of Lake Worth was injured on Connors Highway when a truck driven by a West Palm Beach negro collided with his car. The negro is held in the Okeechobee jail pending the outcome of William's injuries.

Bids for the purchase of \$150,000 bonds of the city of Okeechobee will be received by the city council September 27.

Miss Carrie Low, daughter of Mr. and Mrs. Sidney Low, died in a Lake Worth hospital last week following an operation. The body was brought to Okeechobee for burial in the county. Judge Lovorn. The bride is formerly from Kansas City.

Rev. E. M. C. Dunklin has gone to Melbourne to attend a session of the Indian River association.

A. W. Webb, formerly of St. Andrews, Fla., has succeeded Van Lightsey as manager of Chandler's Market.

Organization of a truck growers' association is advised by County Agent H. P. Peterson, in order that better prices may be had for products. R. M. Wicker announces that W. H. DaCamera of West Palm Beach has bought the lot adjoining the Bank of Okeechobee building and will erect a building and put in a stock of furniture.

WEST PALM BEACH

R. W. Milburn, once a Republican candidate for sheriff, now builder of Rainbow pier at Gus' Baths, has gone to Atlanta to take an examination for promotion from the rank of major to lieutenant-colonel in the reserve corps.

Mrs. Jesse A. Foy died Friday at a West Palm Beach hospital and was buried Saturday. She was born in Palm Beach. Her father, John P. McKenna, was a pioneer settler on the Palm Beach island.

Building construction for which permits were issued in West Palm Beach to the end of August called for a total of over \$3,000,000. There is prospect that 1924 work will exceed any previous years.

Mrs. Morey Dunn, wife of a West Palm Beach lawyer, created a sensation by seizing her two children from her husband, from whom she will seek a divorce.

WOMAN'S CLUB HAS ANNUAL ELECTION

Mrs. C. A. Shive Chosen President; Will Name Committees At Meeting on Sept. 15

Although Monday was Labor Day and a good many people went to Palm Beach, the regular meeting of the Pahokee Woman's Club was well-attended that afternoon.

The annual election of officers was held and following officers were elected: President, Mrs. C. A. Shive, first vice-president, Mrs. E. G. Kilpatrick; second vice-president, Miss H. C. Everingham; secretary, Mrs. W. R. Bailey; treasurer, Miss Lulu Barfield. A primary was held in August at which time the two highest nominees for officer were placed on the ballot as follows: President, Mrs. C. A. Shive, Mrs. Wm. Bloom; first vice-president, Mrs. E. G. Kilpatrick, Mrs. Ira York; second vice-president, Miss H. C. Everingham, Mrs. J. B. McDowell; secretary, Mrs. W. R. Bailey, Mrs. J. R. Poland; treasurer, Mrs. A. Hughes, Miss Lulu Barfield. Mrs. Poland withdrew her name so there was no opponent for Mrs. Bailey as secretary.

After the election a report from the library department was made by Mrs. Hansen. The treasurer's report was read. The new president called for a brief business meeting to precede the president's day social meeting on the third Monday of this month at 3:30 o'clock in the afternoon and urged that all club members try to get there promptly on time as she expects to appoint chairmen and committees for the various departments.

Delicious ice cold lemonade was served and the meeting adjourned.

PAHOKEE

Miss Tommie Gray was among those taking in the ball game at South Bay Sunday.

Mr. and Mrs. John Hattaway and children attended the South Bay base ball game Sunday.

The Rev. F. E. Tiffin and family are visiting with W. O. Tiffin for a few weeks.

Miss Sarah Hansen expects to leave Saturday or Sunday for St. Augustine where she will enter St. Joseph academy for that term.

Among the Pahokee folk who went to South Bay Sunday on the Eagle to see the base ball game were J. H. Tidwell and family who report the trip to have been an ideal one.

Duncan Padgett motored over to Gus' Baths at Palm Beach Sunday afternoon, taking with him his mother, Mrs. Noble Padgett, and small children, and the Misses Ruth, Lillian, Shive and Wilda Friend.

Mr. and Mrs. Roy Arrents and children of Little Rock, Ark., and Mr. Arrents' step-mother, Mrs. Maggie Arrents of Magazine, Ark., arrived last week to spend the season here. They are occupying the Lowell Johnston house.

Miss Natalie Moore and Miss Marie Swickard arrived here Monday to take up their duties as teachers in the grammar school. Their positions have been filled by Mrs. R. E. Jordan and Mrs. H. C. Graham until their arrival.

The Rev. R. Ira Barnett, presiding elder of the Orlando district of the Methodist church, was at Pahokee Thursday and Friday of last week. He preached both evenings while here and held the quarterly conference after his sermon on the last evening.

York & Company are having a new front built to their store this week. A double doorway occupies the center of the front while double show windows are placed on either side of it, adding greatly to the appearance as well as the convenience of the building.

Writing from Philadelphia, under date of August 28 and directing a change of address, R. J. Schroeder says "I expect to start south from New York either the 16th or 18th of September. I have enjoyed each issue of The Everglades News. Everyone I have talked to is very much interested in Florida

and I look for an immense tourist traffic this fall."

Moore Haven Democrat: O. P. Cecil, who has been in Moore Haven for a long time and who has been employed at the A. C. L. railroad depot, has accepted a position near Bradenton and leaves today to take his position on the first. Mrs. Cecil and the children will go with him and help get settled in their new home. Moore Haven folks will be sorry to lose Mr. and Mrs. Cecil, but trust their move will be to their advantage.

AT THE CHURCHES SUNDAY

TORRY ISLAND

Sept. 1.
Wilton Winne and Esther Beader started to high school last Monday, at Chosen. Mr. and Mrs. W. W. Lee, Mr. and Mrs. Henry Braddock, Rita, H. A. and Bertha came up from Miami Monday, returning Tuesday. Mr. Braddock put a new roof on his house while here. On Tuesday morning Lee Bros. butchered a fine beef. Mr. Crockett went to Miami Friday to meet his family, who have been visiting in Tennessee. He will bring them back to the island with him.

Mrs. Councilman and two little girls went to West Palm Beach Friday for a few days stay. While there she will see Miss Agnes Ballard, county superintendent, and get a few things necessary for the school which will start tomorrow. Mrs. Councilman will be our teacher this year. L. D. Bessent made a business trip to Fort Lauderdale last week. Frank Bryan came up from Fort Lauderdale Sunday, bringing the sad news of the death of his aunt, Mrs. P. N. Bryan. Mr. E. T. King returned with him. Mr. and Mrs. Harry Lee spent Sunday at Ross Winne's. They all went to Chosen for a boat ride and called on Mr. and Mrs. Roscoe Braddock. In the evening Mr. and Mrs. J. D. Lee and children, Mr. and Mrs. A. D. Bessent and children, Mrs. Beader, Esther Beader and Elizabeth called for a short time and all enjoyed a very pleasant evening.

BELEE GLADE

Belle Glade, Sept. 3.—Geer & Sons have closed a contract for an electric light plant for Belle Glade. E. E. Ainley has purchased the old Clark house, from which C. E. Riedel has just moved, has moved to his own lot and is remodeling it. He plans starting another filling station in the near future.

Col. J. P. Harbeson was out from West Palm Beach several days last week, installing a new tenant on his farm. He is beginning the planting of a variety of fruits on the place.

J. A. Dew was here last week arranging for an extensive planting of avocados on his farm. Everything points to a good cropping season. The ground is in good condition, except being a little dry on the higher custard apple land. The hum of tractors is heard on every hand and a general feeling of optimism seems to prevail.

Mr. and Mrs. W. H. Badger, who have been touring the north and west, and visiting their family in Winthrop, Washington, returned Saturday. They had an enjoyable trip and were greatly benefited by the rest.

Wm. W. Shipp and party of Miami were here Monday. Mr. Shipp is of the real estate firm of Shipp & Futch and is one of the party of clubmen who bought the W. T. Humphreys place.

Mr. and Mrs. G. A. Hubbell of Miami were visitors here Monday. Mr. Hubbell will return in November with other members of the company owning the tract of land that is, at present under Wm. Snow's care, to decide on the best planting for the same.

D. T. Walters has received two truck loads of pineapples slips which he is busy planting. Other parties are expecting some soon.

W. A. Pagan has returned and is arranging for living quarters for his family, who are at present visiting in North Carolina. He expects to make an extensive planting of sweet peas for cut flowers.

Jas. A. Bright, Hialeah developer, and J. B. Jeffries of Miami, were Belle Glade visitors last week.

The dredge Panama is throwing rock on the north bank of the canal now, giving the blasting crew time to get ahead. The drill barge is something like four miles from the locks.

John Buchanan has returned from his vacation.

W. E. and A. C. Paul have returned from Georgia and will resume their cropping operations on the D. T. Walters place. They brought with them a couple of friends, L. W. and B. Adams, who will crop with them.

The rock crew are making fills in the old river beds crossing the South Bay road, hauling the rock from here. A suggestion of "The Covered Wagon" passed through here a few days ago, when a load of goods came in drawn by a yoke of oxen. They are owned by a colored man of South Bay and are quite a novelty.

C. P. H. S. NEWS

Editor—Sadie Cochran.
Assistant Editor—Edward Moody.
Business Manager—S. E. Gamage.
Current Event Editor—H. Larrimore.
Joke Editor—Witt Guise.

A meeting of the high school pupils was called Wednesday noon, August 27, for the purpose of electing officers for the C. P. H. S. News for the year. The meeting was called to order by the former editor, Miss Sadie Cochran. The former business manager, S. E. Gamage acted as secretary. The officers elected for the coming year are as follows: Editor, Sadie Cochran; Assistant Editor, Edward Moody; Business Manager, S. E. Gamage; Current Event Editor, Henry Larrimore; Joke Editor, Witt Guise.

Pupils attending Canal Point High are:
Freshmen—Lois Rolland, Janie Harrell, Edward Moody, Carl Cone, Floyd Erickson, Christine Mizell, Rosalie Waters.

Sophomore—Ruth Friend, Paul Shive, Devane Larrimore, Katherine Buchanan, Tommie Gray, Janita Elliott.
Juniors—Lola Elliott, Henry Larrimore, S. E. Gamage.
Seniors—Lillian Shive, Sadie Cochran.

Miss Katherine Buchanan joined the sophomores Monday.
Miss Lillian Shive was absent Tuesday afternoon, on account of illness.
Devane Larrimore was absent Tuesday on account of illness.

The ball game played between Canal Point High and the East Beach Thursday was won by the East Beach team by score of 11 to 6.

Plans are being made for the basket ball and tennis court and donations will be greatly appreciated by the students. Anyone wishing to donate toward it kindly notify Prof. Asson, S. E. Gamage or Sadie Cochran.

CANAL POINT

Miss Katherine Buchanan returned Saturday from Sarasota, where she spent the school vacation.

T. J. Rushing of Bacom Point is shipping black-eye peas to the West Palm Beach market.

An examination of applicants for the position of postmaster at Canal Point will be held at West Palm Beach September 20.

An apartment house is much needed at Canal Point. Here is a fine business opportunity for someone.

Repeal of the five-mile stretch of road east of 20-mile bend has been completed. The section is yet to be sold.

Neil A. Campbell, dredging contractor, was a caller at the office of The Everglades News Wednesday.

S. W. Powell, over-sea timekeeper with A. A. Sturges' crew on Conners Highway, is now clerking at the Highway store.

R. M. Baker, manager of the Canal Point Highway Store, made a business visit to West Palm Beach the latter part of the week.

Mrs. Belle Thomas returned Sunday from a visit to Fort Pierce. She was accompanied by her brother and his wife, who spent the day here.

J. R. Kintz is back from Lastrobe, Pa., where he visited for two months. He has resumed his farming operations north of town.

Miss Mildred Mitchell of Chicago, daughter of Charles E. Mitchell, the tollgate keeper at St. Lucie, is visiting her father.

Herb McKellup came up Monday with a load of household goods from West Palm Beach. He will occupy a new house built recently on land owned by his father-in-law, F. J. Watkins of West Palm Beach.

Many automobiles seen on East Beach display metal tags on which is the name "Pahokee". The tags were given out by President Ira York of the Chamber of Commerce.

Thibodeaux & Kintz are to erect a house near the cane-testing station for Superintendent C. P. Sheffield's colored employees.

Two Louisiana sugar men called on C. P. Sheffield at the cane-testing station Friday. They expressed amazement at the growth of the cane, which is much better than the Louisiana cane.

Rev. B. A. Geiger of Melbourne is here visiting his sons, Dr. J. C. and Dal, and his daughter, Mrs. J. E. Carter. He has only partially recovered from injuries sustained when he fell from a bicycle at Melbourne, several months ago. Rev. Geiger is a pioneer preacher on the east coast and is widely known there.

C. G. Hunt, lately of Dade City and formerly of Live Oak, arrived Saturday and is stopping with J. C. Herrell. He expects to remain permanently on East Beach.

J. A. Rostan of Lake Worth, vice president and manager of the Pioneer Investment Company, and E. S. Motter of Lake Worth, treasurer of the company, were here Friday. Mr. Rostan will go north this month on a vacation and he and Mr. Motter were here to meet Poland & Vann, sales agents for the subdivision property. Unless a contract for paving and sidewalks can be given to the Canal Point-Pahokee road, its stonewise improvement probably will have to wait until the railroad is finished and Ojus rock can be brought in.

Mr. Rostan says.

F. L. Bellamy of Lakeland was a visitor on East Beach last week, the guest

of L. L. Stuckey. He is a paving contractor and during his stay here he talked with J. A. Rostan, manager of the Pioneer Investment Company, about taking a contract for paving streets north of the canal. If Mr. Bellamy gets this contract he will buy a tract of land and take up permanent residence here and he may locate here anyway, he says. He was at the point of locating on East Beach two years ago but the high water came on and like many others he deferred decision until there was more assurance that the canals would take water off of the land instead of running it on.

Moore Haven Democrat: Mrs. Griffith has made a great many friends who regret that she has decided to move to another city. Their best wishes will go with her to her new home. Miss Annie Griffith goes to Canal Point to make her home with her mother. She will be much missed by the young folks here.

Stacy Lowe, Constance Windham and Elizabeth Lowe returned Saturday from an Epworth League convention at Winter Park. They attended the meetings from Tuesday forenoon, until Thursday forenoon. On account of an accident with the car of Rev. and Mrs. Thomas they accompanied them to the meetings but they did not attend the meetings but they were especially good to the Canal Point people.

"STALLED IN THE SAND"
A hotel might have been financed at Pahokee ere this if the road was finished to that town from Belle Glade or a road made from Canal Point. With a good hotel there, motorists from all over the state would have reason to make a stay at Pahokee and investigate the opportunities for investment in an ice factory and other businesses.

But motorists generally know the condition of the road between Canal Point and Pahokee. When they do not know the condition of the road they are likely to get stalled in the

'WHAT SHALL I GET FOR DINNER?'

Fixing up a menu three times a day, 365 days a year, is something of a job under the best conditions. It is a problem for housewives everywhere. Think how much harder it would be if the Highway Store did not help solve the daily problem. We do help solve it by keeping a full line of Staple and Fancy Groceries.

If there is something we have not thought to keep in stock tell us about it. We want to make our service complete.

PALM BEACH COUNTY

SOUTH FLORIDA

City delivery of mail by carrier is
sought by the Luncheon Club of Home-
stead.

Young men at Fort Myers have or-
ganized a junior Chamber of Com-
merce.

The Arcadia telephone exchange is
to be equipped with an automatic
switchboard.

A drag-line machine started at Flori-
da City last week dredging material
for the Key Largo road.

James H. Woodruff, a big real es-
tate operator of Clearwater, has made
a \$100,000 investment in land at Vero
that will be subdivided.

Machinery of the Indian River Fer-
tilizer Company's plant at Vero, was
tried out last week. The plant is op-
erated by the Non-Acid Fertilizer Com-
pany of Lakeland.

Real and personal property at Vero
is assessed at \$2,030,120, which is near-
ly a million more than last year.

Two more traffic officers will be put
on duty on Dixie highway in St. Lucie
county.

Grace Parrish, a Homestead girl,
caught a 31-pound barracuda at the
mouth of the Florida City canal. Grace
is five feet tall and has the distinction
of having caught a fish as long as she
is tall.

Grading for the second track of the
Florida East Coast railroad is pro-
gressing between Fort Pierce and
White City, in St. Lucie county. Grading
is under way at other points in the
county also for the parallel track.

F. E. Decker, a vice president of the
First-American Bank & Trust Com-
pany of West Palm Beach, is spending
a summer vacation at Black Mountain,
N. C., his wife and daughter accom-
panying him. Mr. Decker is a regular
visitor to lake communities.

The Miami Herald of Monday print-
ed three photographic views of the two
drag line machines that are making
grade for the Florida East Coast rail-
road. The photographs were taken and
sent to the Herald by Louis Goolsby,
the Herald's correspondent at Canal
Point.

PALM BEACH COUNTY

The Palm Beach council is rebuilding
the Ninth street bridge near the Con-
gregational church.

A. Jensen for the extension to the
municipal light and water department
of Lake Worth on his bid of \$1,976.93.

The Bank of Boynton has purchased
a \$68,000 issue of time warrants of the
South Lake Worth inlet commission.
The warrants were issued to finance
work on the project.

Order has been placed for machinery
for the Lake Worth creamery, which
will be located in a building on South
Dixie highway leased from W. A.
Boutwell.

Thomas B. Marsh, who made his
headquarters at West Palm Beach, has
resigned as scout executive for the
East Coast Council to become Florida
representative of a North Carolina
construction company.

W. S. Cawthorn, state superintendent,
will open the tri-county institute in the
high school auditorium at West Palm
Beach Monday evening, September 22.
Teachers from Palm Beach, Broward
and Dade counties will attend the ses-
sions.

Pinecock street in the negro section
of Stuart, is to be paved at a cost of
\$2,000. Specifications call for 1400
feet of 15-foot paving rock 6 inches
over the old rock which is to be used
as a base. This is a wise action.
Negroes should be encouraged to own
their homes and as taxpayers and
home-owners they should get even a
little better than their share of the tax
money. White people will be better off
for treating the negroes fairly.

BROWARD COUNTY

Use of the coast guard property at
Las Olas beach, near Fort Lauderdale,
is sought for the Boy Scouts, Girl
Scouts and Sea Scouts.

A Fort Lauderdale man who, tried
to fondle small girls in a moving pic-
ture house, was soundly thrashed by
the girl's father.

L. K. Cannon, assistant state high-
way engineer, was the guest of Sec-
retary Blank of the Chamber of Com-
merce and inspected Broward county
roads.

William C. Morris post of the Amer-
ican Legion at Fort Lauderdale gave a
dance on the streets.

The passenger station has been open-
ed and trains now stop at Hollywood.
N. R. Hurst, an attorney from In-
dianapolis, Ind., has located at Fort
Lauderdale.

Contract to rebuild the Queen theater
at Fort Lauderdale has been let at
\$19,000 to J. F. Humphrey of Homestead.

Mrs. Bess B. Vail, lately from Erie,
Pa., has leased the Glades restaurant
at Fort Lauderdale.

The Broward County Sentinel will
be issued as a daily paper commencing
September 8.

E. W. Thompson of Toulon, Ill., has
traded an apartment house in Wichita,
Kans. to J. W. Vanman for the Browning
grove of 40 acres just outside the
Fort Lauderdale city limits on the
Davis road. The grove was set out
in 1903 by an association of which the
actor Joe Jefferson was a member.
Later it was owned by the Browning
who invented the machine gun of that
name.

GLADES LAND TRANSFERS

W. D.-W. H. Badger and wife to
M. C. Eggleston and wife. Beginning
at point 130 feet north and 130 feet east
of sw corner of sec. 32, the east 40 feet,
north to cross-state highway, thence

38, \$800.

W. D.-Katherine J. Greene and hus-
band to Mary A. Hemmion, s-l-2 nwl-4
and n-l-2 sw-l-2 sec. 36-37-38.

W. D.-William McConnell and wife
to William A. Hucksin, sw-l-4 nwl-4
sw-l-4 sec. 19-43-35, \$800. Also lot 13,
block 14, Okeelana, \$800.

FUEL FOR DREDGE

The tow-boat Levantian is pulling
barges loaded with slabs through
Canal Point lock and the lake for a
dredge that Contractor Tom M. Bryan
is operating on Okeechobee road canal.
The slabs are used as fuel for the
dredge and come from the Palm Beach
Loxahatchee Company's sawmill and
are loaded at Loxahatchee Farm. The
tow-boat cannot pass under the bridge
on Okeechobee road canal at 20-mile
bend hence it comes through West
Palm Beach and through the
lake into Hillsboro canal.

CORRESPONDENCE

By THOMAS HUNTER.

Tallahassee, Aug. 28.—The trustees
of the Internal Improvement Fund, the
I. I. Board, are all in Tallahassee again,
with very satisfactory recollections of
the people on the southeast shore of
Lake Okeechobee. The commissioner
of agriculture has received through the
regular channel the official information
and notification to proceed with the
sale of the land in section 13 to the
parties named in the minutes as buy-
ers. When Land Clerk C. B. Gwynn
is back from his vacation he is ex-
pected now any day—the necessary
papers for signature, etc., will be for-
warded to the buyers.

I visited the department of the state
geologist, Mr. Herman Gunter, and
found matters of interest. It is on the
ground floor of the capital, in the rear
end, just opposite the drainage engi-
ner's office. A little time can be well
spent looking over the fossils in the
geological museum room. Here are
specimens of some of Florida's
"elephants' teeth, mammoths' thigh
bones, ancient horses' teeth, petrified
portions of whales, fish fossils, rare
shells and specimens of phosphate and
lime and clay deposits. Here too are
many books on geology and pamphlets
reports of expeditions of geologists and
geographers in various localities in
Florida. The State Geological Survey,
as this department is called, publishes
a report every year. Its next report,
the sixteenth annual report, will be on
the "Limestones and Marls of Florida."

The required field work is being done
by Mr. Gunter and Mr. McMillon.
They began on January 1, 1924. Their
field work will be finished by the end
of October, and the book will be out
early in 1925. Over a million dollars
value of limestones and marls is being
used every year in Florida, alone as
road material. The report will contain
certain statistics of production of phos-
phates, fuller's earth and kaolin dur-
ing 1923. Kaolin is a pottery clay, the
highest grade produced in the United
States. It is used in the manufacture
of high grade porcelain ware by the
potteries of Ohio, New Jersey and
New York. This report will also con-
tain certain recommendations for the
future success of the department. To
discover that part of Florida's essen-
tial wealth, its mineral, and to draw
attention to them with appropriate in-
formation is to do a very valuable
service to manufacturing, now existing
and possible to exist, in the state. It
is to supply this information in this
basic line that the State Geological
Survey was created by the legislature
in 1907.

The geography and vegetation of
Florida has been reported upon in de-
tail in one book from the northern line
of the state to the northern line of
Okeechobee county, and the geography
and vegetation of the central part of
Florida in another book. The geo-
graphy and vegetation of the southern
part of Florida is the next subject to
be dealt with. Roland M. Harper,
geographer and botanist, who spends
most of his time on surveys of Georgia,
Alabama and Florida, has been en-
gaged for a time on this work. Among
other things the underground waters
will receive special attention. On the
important subject of clays suitable for
making brick, clays of a noted
specialist, Prof. O. G. Bell of Cornell
University, is coming to Florida to as-
sist those manufacturers already here
in making a better product and the
information obtained will probably
bring new manufacturing industries
and concerns to Florida. Mr. Gunter's
"Fiftieth Annual Report," consisting
of 266 printed pages with many illus-
trations, is itself quite a comprehensive
work on the clays of Florida.

Mr. Herman Gunter, B. S., has been
state geologist since April 18, 1919,
when he succeeded Dr. E. H. Sellards
who then entered the Bureau of Eco-
nomic Geology and Technology of
Texas.

OUR MARINE WAYS

ARE FINISHED AND READY

The Ways are plenty big enough to pull
any boat or barge on Lake Okeechobee,
and as we have two very competent men
always on the job we can not only make
a good job of repairing but we can do a quick
one. We have had two boats on the ways
already and pulled both of the boats with-
out the least difficulty. Our carriage is
100 feet long, so it will more than take care
of any boat in this region.

As many of the boats on Lake Okeechobee need some
work done on them as this is the season in which
such work is generally taken care of, we are looking for-
ward to a number of inquiries from this announcement
in The Everglades News.

We have practically all of the Ford parts
and a big supply of Marine parts, which we
can deliver to any of the lake section the
same day the orders are received.

CLEWISTON SUPPLY COMPANY

CLEWISTON, FLA.

Hardware, Dry Goods, Groceries, Automobile and
Marine Goods

SHIPPERS, PATRONIZE

Clewiston Boat Line

Daily freight service to Clewiston from
East Beach, South Bay and Belle Glade.

Send your shipments to Clewiston and we will put
them in the market 12 to 24 hours earlier than by any
other route.

At Panoke deliver to A. Kaltenbruner.

When you ship via Clewiston Boat Line you get a bill
of lading that is negotiable. We bill your shipments
through to final destination.

Farm Talk

Howard Sharp

The most important thing that has taken place in any part of the Everglades drainage district for a long time is the sale of the old South Florida Farms Company property in Glades county, carrying with it the sale of about 200 lots in the town of Moore Haven. This assumes that a sale has been made and that it is not a sales contract. N. F. Stone of St. Petersburg is announced as the buyer. The Glades County Democrat, which has a story of the transaction, does not seem to know who Mr. Stone is, and the Tampa Tribune and other papers that carry news of the deal do not give any information about him. Too many Florida "sales" are nothing more than options or contracts or arrangements by which commissions are to be paid on later transactions.

Probably with good reason from his and their standpoint, Clarence M. Busch, the trustee of the South Florida Farms Company, and his associates have declined to make expenditures for development. Mr. Busch is understood to be well along in years; he has other resources and he does not want to live in Moore Haven. In this situation it was hard for business men of Moore Haven or other property owners in Glades county to do much; they had to carry Busch and his associates as well as their own load.

The Moore Haven territory has its merits and advantages and it has also some shortcomings. By one policy Mr. Stone can make money for himself and the people who buy from him; by another policy he may make money for himself only at the sacrifice of other people. The Everglades News will watch with interest to see what he does with his new possession.

The muck soil around Moore Haven is as good as the muck soil elsewhere; there is question, however, whether the climatic conditions in the entire district are wholly favorable to trucking on a large scale. If too much emphasis is put on the opportunities for money-making by raising winter vegetables, that will be a bad policy. Good sugar cane, corn and peanuts and forage crops can be grown in all part of the district; that has been proved. If the plans for sub-district drainage systems are carried out and the land is offered as fit for general farming, this offer can be made in good faith and supported by the testimony of all who know that part of the country and the buyers can do well. This policy requires that the land be offered at prices proper for land for general farming; there is no justification for representing all of the land as worth several hundred dollars an acre for trucking.

There is room for more tourist towns; there is no tourist town on Lake Okeechobee and there may well be, two or three of them. All of the lots in the town of Moore Haven can be made to be worth several times what they are selling for by providing a good tourist hotel, golf course, tennis courts and other facilities for recreation, including boats and guides for hunters and fishermen.

Holding as I do to the strong belief that good citrus groves can be made in the muck soils, and particularly on the edge of the Glades, I see no reason why groves cannot and should not be established in the Moore Haven territory.

Glades county has a fair roads system; it is soon to have a particularly good roads system. With the completion of state road No. 8 and this state road connected with Connors Highway, and with the Seaboard Air Line on the north line of Glades county, the west and northwest shore of Lake Okeechobee has great possibilities.

THE EXOTIC GARDENS

W. D. STURROCK

300 South Olive Street West Palm Beach, Florida

'RAILROAD A-COMING' AND POPULACE IS UNMOVED, BUT IT MAY CAUSE UPTURN IN TRUCKING INDUSTRY

From the Palm Beach Times

When railroads built into the west the northwest and the southwest, the "coming of the railroad" was the biggest event in local history. Now after the lapse of a quarter of a century or half a century, pageants and other formal of local celebrations in cities and towns in the west often are based on the incidents of the construction of the railroad and the settlement of the country.

Two railroads are being built through the northern part of Palm Beach county but the residents of that region are not particularly excited about it. Leastways none of them are planning any pageants. Whether the residents are indifferent or merely seemingly indifferent or whether they are stunned or flustered is hard to know. Whereas in the west there was a town-site every eight miles in advance of the oncoming rails and prospectors of a new Chicago at each of them, not a sub-division has been laid out so far on the route of either the Florida Western & Northern or the Florida East Coast railroads.

If there is real estate speculation in Florida it cannot be proved by the condition on the eastern live of Lake Okeechobee. The tourists who are forever accusing Floridians of capitalizing every circumstance will find themselves wrong here. People on the east coast may or may not be enthused over the building of the two railroads into their territory but the railroads are not in the lives of the stoical people of the upper Everglades. The people in the Everglades have been disappointed so many times they have seen many plans for highways and railroads vanish into the thin air, that they will not be surprised if the embankments and tracks that

are being laid for the Florida Western & Northern and the Florida East Coast take wings and move from the ground upward and disappear from sight like a passing airplane lost in the distant clouds. It may be that the real estate speculation and capitalization of incidents is done by the tourists themselves and that the "hurrah boys" stuff will start after the opening of the Hotel Royal Poinciana.

And yet the building of two railroads into the third of the country, one of them along the eastern shore of Lake Okeechobee, may have a tremendous influence on the trucking industry in South Florida—it may be a revolutionary influence. It is likely to make West Palm Beach the headquarters of the commission houses and buyers who deal in winter vegetables for West Palm Beach will be in close touch with the old districts on the east coast and the new districts north and west.

For three years there has been a steady increase in the vegetable acreage in the north end of Palm Beach county; this year there will be a marked increase in St. Lucie county also. The big increase in the next eighteen months will be in the area which is just being provided with adequate transportation facilities—the eastern shore of Lake Okeechobee and the country north of St. Lucie canal through which the Florida Western & Northern railroad is building. This new area will have better transportation facilities than Dade county, ever had; it is closer to markets and the soil is new. Can Homestead and other parts of Dade county hold out against this new competition? That is the question widely discussed among people who handle tomatoes and other winter vegetables.

SEABOARD MOVE FREIGHT BY TRUCK

Growers To Get Way Bills On Highways, Produce To Go Through Without Delay

SERVICE BY BOAT, ALSO; BRANCH LINES LATER

Bridge Material At St. Lucie Canal By October 1; Line Open By First of Year

Operation of a fleet of trucks as well as a fleet of boats to haul vegetables and fruits from points off of its line to freight stations on its line is being considered by the Seaboard Air Line railroad management as a means of getting business pending the construction of branch lines. The Seaboard Air Line is to operate the Florida Western & Northern railroad, now building from Coleman to West Palm Beach through the northern part of Palm Beach county.

At Avon Park last week C. J. Blanchard of the development department of the Seaboard Air Line, said that with the completion of state road No. 8, from Lake Annie to the Kissimmee river, motor trucks would be put on to haul fruits and vegetables to Okeechobee for loading in through cars, with full refrigerator service to all points north and northeast. Announcement had already been made that the Seaboard management was planning the receipt of vegetables from the upper Everglades at its freight station at Okeechobee and Indian town, shipments from points on Lake Okeechobee to be carried in boats which would issue through way bills.

The Seaboard truck and boat service and the direct railroad service to be offered to growers by the Florida East Coast railroad make certain that superior transportation facilities will be available to growers and shippers in the upper Everglades during the coming vegetable-marketing season.

Material for the F. W. & N. railway, bridges over the St. Lucie canal and Kissimmee river has been ordered for delivery at those points October 1st, according to advices received at Okeechobee.

The Jefferson Construction Company started to lay rail between Henry creek

and Lettuce creek in Okeechobee county Wednesday noon and by Monday a good start toward St. Lucie canal, the end of this division, had been made.

Between Avon Park and Arbuckle creek the grade is practically completed. No permanent track has been laid in Avon, except a short stretch through the crate mill quarters, but ties are being stacked all along the right of way and rails are arriving daily. Temporary track has been laid practically through this stretch to facilitate construction. Work is being pushed on the grade throughout the division, according to Engineer H. S. Thomas, with headquarters at Avon Park. He states it is 60 per cent completed.
